INDEX TO VOLUME 8, FOREST SCIENCE, 1962

Art.—article; rev.—review; art. (rev.)—review of article or book by.

Authors are indicated by capitals.

AIRD, PAUL L. art. 413
ALEXANDER, MARTIN. rev. 235
ALLEN, G. S. art. 64
ANDERSON, NEIL. art. 378
Apical dominance. Aspen root sucker formation and. art. 403
Aspen root sucker formation and apical dominance. art. 403
ATTIWILL, P. M. art. 132
BAKUZIS, EGOLFS V. art. 119
BARNES, ROBERT L. art. 284
Basidiomycetes and decay in silver maple stands of central Iowa. art. 263
BEEVERS, HARRY. rev. 162
Birch, white. Relationships of dieback to rooting depth of. art. 219
BOYCE, JOHN SHAW. rev. 384
BOYCE, STEPHEN G. art. 180
Branch dry weight and leaf area from measurements of branch girth in eucalyptus. Estimating. art. 132
BRANDT, W. H. art. 334
BRIEGLEB, PHILIP A. art. (rev.) 83
BROWN, RANDOLPH M. art. 119
BRYAN, W. C. art. 384
BULL, W. IRA. art. 32
CALLAHAN, J. C. art. 68
Chemical changes in decaying wood. art. 277
Chestnut chromosomes. art. 372
Chestnuts. Colchiploidy of. art. 43
CHING, KIM K. art. 21
CHING, TE MAY. art. 21
Chlorophenoxybutyrics. On Douglas- fir. Herbicidal selectivity of. art. 353
Chromosomes. Chestnut. art. 372
Continuous forest inventory with partial replacement of samples. For. Sci. Monog. 3. (a separate)
Cobalt-60 gamma radiation. Effect of. On pine seed and one-year-old seedlings. art. 411
Colchiploidy of chestnuts. art. 43
Commercial thinning of Douglas-fir in the Pacific Northwest. rev. 206
Comparisons between agriculture and forestry. Resource inputs and outputs growth: art. 68
Composition of gum turpentines of pines. rev. 207
COOK, R. L. rev. 287
COPELAND, OTIS L. art. 12
CROCKER, ROBERT L. art. 2
CUNIO, TIBERIUS. For. Sci. Mong. 3. (a separate)
CZABATOR, FELIX J. art. 386
DAVIS, TURNER S. art. 411
Decaying wood. Chemical changes in. art. 277
Decay resistance of wood from some wilt-infected species of oak. art. 334
DERMEN, HAIG. art. 43
Dieback, relationship of. To the rooting depth of white birch. art. 219
Die-out in Loblolly Pine Plantations. Spot. Soil characteristics associated with. art. 12
DILLER, JESSE D. art. 43
Douglas-fir cones and seed, Maturing. Physical and physiological changes in. art. 21
Douglas-fir. Herbicidal selectivity of chlorophenoxybutyrics on. art. 353
Douglas-fir seedlings. Genotypic variation in photoperiodic response of. art. 360
Douglas-fir seedlings, root-regenerating potential of. Lifted at different times of the year. art. 288
Douglas-fir seed, sown. Fate of. art. 210
Dwarfmistletoe incubation period on ponderosa and Jeffrey pines in California. art. 16
Dwarfmistletoe, ponderosa pine. The endophytic system of. In relation to small branch tissues. art. 298
DUFFIELD, JOHN W. art (rev.) 167
Economics of reforestation. rev. 65
Electrical resistance. Temperature injury to conifers measured by. art. 303
Elevation, aspect, and cover effects on maximum snowpack water content in a western white pine forest. art. 225
Elytroderma deformans. Significance of life history studies of. art. 250
Endophytic system of ponderosa pine dwarfmistletoe in relation to small branch tissues. The. art. 298
ESLYN, WALLACE. art. 263
Eucalyptus. Estimating branch dry weight

and leaf area from measurements of branch girth in. art. 132
Eucalyptus. Effects of gibberellic acid on woody perennials with special reference to species of. art.
FARMER, ROBERT E., JR., art. 403
Fate of sown Douglas-fir seed. art. 210
Fertilization, weed control and the growth of poplar. art. 413
Fomes annosus spores, air-borne. Seasonal incidence of stump infection in Norway spruce by. art. 98
Forest biometry. rev. 382
Forest management rev. 83
Forest nursery. The. rev. 262
Forest pathology. rev. 384
Forest soils. rev. 396
Forest yield. The science of. rev. 205
Free sugars. Seasonal changes in cold resistance and. Of some hardwood tree barks. art. 255
FRENCH, D. W. art. 378
GALSTON, ARTHUR W. rev. 204
Genotypic variation in photoperiodic response of Douglas-fir seedlings. art. 360
Geographic variation in European black pine—two year results. art. 32
GESSEL, STANLEY P. art. (rev.) 235
Gibberellic acid, effect of. On seed germination of elm, Scotch pine, Colorado and white spruce. art. 187
Gibberellic acid, effects of. On woody perennials with special reference to species of eucalyptus. art. 168
GLERUM, C. art. 303
GRAH, RUDOLF F. art. (rev.) 65
GRAVES, PAUL F. art. (rev.) 67
GROVER, R. art. 187
Growth of plantation black walnut in relation to pH and certain chemical factors of the soil. art. 322
Growth periodicity, diameter. Of several tree species in the South Carolina coastal plain. art. 363
Growth, volume and diameter. Of ponderosa pine trees as influenced by site index, density, age, and size. art. 236
Guide to wildlife feeding injuries on conifers in the Pacific Northwest. rev. 218
GUTHRIE, JOHN A. and GEORGE R. ARMSTRONG. rev. 66
HADDOCK, PHILIP G. art. (rev.) 206
HARKIN, DUNCAN A. art. 363
HEPTING, GEORGE H. art. (rev.) 384
Herbicidal selectivity of chlorophenoxybutyrics on Douglas-fir. art. 353
HOSNER, JOHN F. art. 180
HOWARD, WALTER E. art. (rev.) 218
Inoculation, artificial. Of wet and dry heartwood of living eastern white pine trees. art. 163
Inventory. Continuous forest. With partial replacement of samples. For. Sci. Monog. 3. (a separate)
IRGENS-MOLLER, H. art. 360
JAYNES, RICHARD A. art. 372
JENKINSON, JAMES L. art. 288
JOHNSON, NORMAN E. art. (rev.) 63
JONES, JOHN R. art. (rev.) 283
KORSTIAN, C. F. art. 149
KOSHI, PAUL T. art. 191
KOZLOWSKI, THEODORE T. rev. 302
KRUGMAN, STANLEY L. art. 288
LAWRENCE, WILLIAM H. art. 142, 210
LAWRENCE, WILLIAM H., NELSON B. KVERNO and HARRY D. HARTWELL rev. 218
LEMMON, PAUL E. art. 236, 397
Leaf area from measurements of branch girth in eucalyptus. Estimating branch dry weight and. art. 132
Life of the green plant. The. rev. 204
LINZON, S. N. art. 163
Loblolly and shortleaf pine plantations. Prediction of pulpwood yield of. art. 149
Loblolly pine plantations. Soil characteristics associated with spot die-out in. art. 12
Loblolly pine seedlings and immediate environment. Shade and mulch as influences on. art. 191
Loblolly pine site curves by soil groups. 104
Loblolly pine. Terminal growth and wood formation under two soil moisture regimes. art. 345
LORTIE, MARCEL art. 219
MARTIN, ALEXANDER C. and WILLIAM D. BARKLEY rev. 371
McALPINE, R. G. art. 12
McCOMB, A. L. art. 322
McKERN, H. H. G. art. (rev.) 207
Measure of point density. A. art. 85
MEYER, H. ARTHUR, et al. rev. 83
MEYER, WALTER H. art. (rev.) 205
MILLER, J. M. and F. P. KEEN. rev. 63
MIROV, N. T. rev. 207
Model construction and the use of triangular models in forestry research. Elements of. art. 119
Mycorrhizae on shortleaf and loblolly

pines. Additional syntheses of. art. 384
New laws for new forests. rev. 67
Oak. Decay resistance of wood from some wilt-infected species of. art. 334
OLIVER, WILLIAM W. art. 51
Ornithine-2-C^{14} metabolism in loblolly pine needles. art. 284
OSBORN, KATHERINE H. art. 309
PACKER, PAUL E. art. 225
PARKER, JOHNSON art. 255
PERRY, THOMAS O. art. 336
Photoperiodic response of Douglas-fir seedlings. Genotypic variation in. art. 360
Pine, European black. Geographic variation in—two year results. art. 32
Pine, Loblolly. Ornithine-2-C^{14} metabolism in needles. art. 284
Pines, red and jack. The influence of thinning and pruning on the date of summerwood initiation in. art. 51
Physical and physiological changes in maturing Douglas-fir cones and seed. art. 21
Point density. A measure of. art. 85
POMMERLEAU, RENÉ art. 219
Pollination of Douglas-fir with water suspensions of pollen. art. 64
Ponderosa pine. Racial variation in. For. Sci. Monog. 2 (a separate)
Ponderosa pine trees. Stocking density around. art. 397
Ponderosa pine trees. Volume and diameter growth of. As influenced by site index, density, age, and size. art. 236
Poplar. Fertilization, weed control and the growth of. art. 413
Racial variation in ponderosa pine. For. Sci. Monog. 2. (a separate)
Racial variation in the day and night temperature requirements of red maple and loblolly pine. art. 336
RALSTON, C. W. art. 149
REDISKE, J. H. art. 142, 210, 353
art. (rev.) 302
Resource inputs and outputs growth: comparisons between agriculture and forestry. art. 68
Respiratory metabolism in plants. rev. 162
RICHARDS, D. B. art. 277
ROMBERGER, J. A. art. (rev.) 162
Root-regenerating potential of Douglas-fir seedlings lifted at different times of the year. art. 288
Root rot of conifers in Minnesota. Cylindrocladium. art. 378
Root sucker formation and apical dominance. Aspen. art. 403
RUDOLF, PAUL O. art. (rev.) 371
RUPF, HUBERT rev. 262
RUTTAN, V. W. art. 68
SCHNIEWIND, ARNO P. art. 111
SCHUMACHER, F. X. art. 236, 397
SCURFIELD, G. art. 168
Seasonal changes in cold resistance and free sugars of some hardwood tree barks. art. 255
Seed germination. Germination value: an index combining speed and completeness of pine. art. 386
Seed identification manual. rev. 371
Seed. Physical and physiological changes in maturing Douglas-fir cones and. art. 21
Selenium as a wildlife repellent for Douglas-fir seedlings. art. 142
Sequoia, giant, on soil properties. The influence of. art. 2
Shade and mulch as influences on loblolly pine seedlings and their immediate environment. art. 191
SHEA, KEITH R. art. 298
Shortleaf pine plantations. Prediction of pulpwood yield of loblolly and. art. 149
SILEN, ROY R. For. Sci. Monog. 2 (a separate)
Site curves by soil groups. Loblolly pine. art. 104
Silver maple stands of central Iowa. Basidiomycetes and decay in. art. 263
Snowpack water content, maximum. In a western white pine forest. Elevation, aspect, and cover effects on. art. 225
Soil characteristics associated with spot die-out in loblolly pine plantations. art. 12
Soil management for conservation and production. rev. 287
Soil microbiology. Introduction to. rev. 235
Soil, pH and certain chemical factors of. Growth of plantation black walnut in relation to. art. 322
Soil properties. Influence of giant sequoia on. The. art. 2
SOLBERG, ERLING D. rev. 67
SMITH, J. HARRY G., et al. rev. 65
Specific gravity. Horizontal. Variation in tree stems in relation to their support function. art. 111
Spruce, Norway. Seasonal incidence of stump infection in. By air-borne *Fomes annosus* spores. art. 98
SPURR, STEPHEN H. art. 85

SQUILLACE A. E. For. Sci. Monog. 2 (a separate)
STAEBLER, GEORGE R. art. 353
STEPHENSON, GEORGE K. art. 191
Stocking density around ponderosa pine trees. art. 397
STOECKELER, JOSEPH H. art. (rev.) 262, 396
STONE, EDWARD C. art. 288
Style manual for biological journals. rev. 167
Summerwood initiation in red and jack pines. The influence of thinning and pruning on the date of. art. 51
Sweden's climate. Studies on the humidity of. rev. 283
SZIKLAI, O. art. 64
TAMM, OLAF F. S. rev. 283
TAYLOR, D. P. art. 378
Temperature injury to conifers measured by electrical resistance. art. 303
Terminal growth and wood formation by juvenile loblolly pine under two soil moisture regimes. art. 345
Theses, forestry. Accepted by colleges and universities in the United States. Supplement July 1960-June 1961. art. 309
THOMSON, GEORGE W. art. 322
Tolerance to water saturated soil of various bottomland hardwoods. art. 180
Tree growth. rev. 302
Volume and diameter growth of ponderosa pine trees as influenced by site index, density, age, and size. art. 236
WAGENER, WILLIS W. art. 16
Walnut, plantations of black. Growth in relation to chemical factors of the soil. art. 322
WARE, KENNETH D. For. Sci. Monog. 3. (a separate)
WATERS, CHARLES W. art. 250
Western pine beetle. The. rev. 63
Western forestry industry—an economic outlook. rev. 66
WESTING, ARTHUR H. art. (rev.) 204
White pine trees, living eastern. Artificial inoculation of wet and dry heartwood of. art. 163
WILDE, S. A. rev. 396
Wildlife repellent for Douglas-fir seedlings. Selenium as a. art. 142
Wilt-infected species of oak. Decay resistance of wood from some. art. 334
WORTHINGTON, NORMAN P. rev. 206
WRIGHT, JONATHAN W. art. 32
YDE-ANDERSEN, A. art. 98
Yield of loblolly and shortleaf pine plantations. Prediction of pulpwood. art. 149
ZAHNER, ROBERT art. 51, 104, 345
ZAK, B. art. 384
ZINKE, PAUL J. art. 2
ZIVNUSKA, JOHN A. art. (rev.) 66
